AMPFIBIAN PROTECTS

AMPFIBIAN is available in three versions:

- 15A to 10A adapter with earth leakage and overload (RV-02)
- 15A to 10A adapter overload-only (RV-01)
- 10A safety with earth leakage and overload (GP-02)

Both RV versions allow the safe and legal connection of a 15A load such as a caravan or other recreational vehicle to a standard 10A supply when a 15A circuit is unavailable.

The GP version provides in-line protection at construction sites, in mines and other demanding environments.

- Weatherproof
- Cleat secures outlet lead
- Personal safety device
- Safely connect to domestic outlets
- Designed and made in Australia

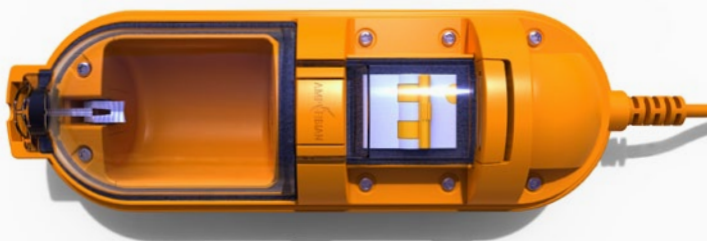

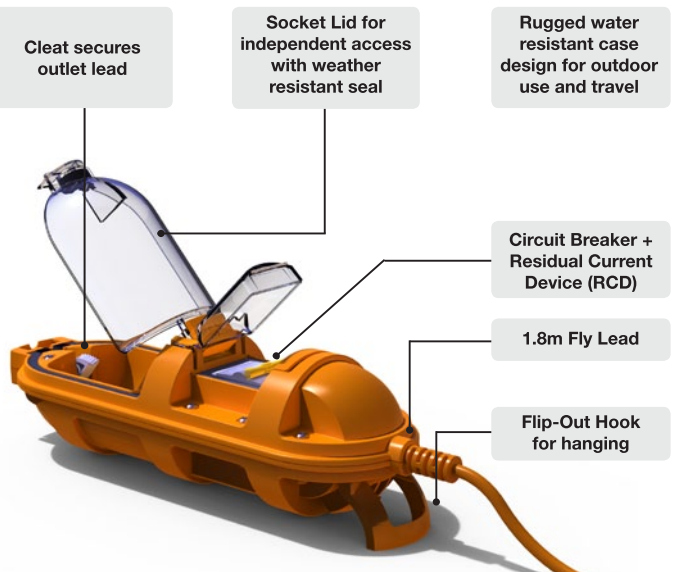

HOW IT WORKS

AMPFIBIAN can safely and legally connect your recreational vehicle to any 10A domestic power socket.

AMPFIBIAN automatically trips if the power outlet becomes overloaded, protecting your domestic power supply.

The RV-02 and GP-02 versions additionally protect against electric shock using a Residual Current Device (RCD).

FEATURES AND BENEFITS

MODEL	GP-02 COMING SOON	RV-02	RV-01
OVERLOAD (MCB)	✓	✓	✓
