FAQ

Q: Will I be able to receive the new, Free To Air Channels that are available in my local Area with this TV?

A: YES, the New Sphere Platinum Range of LCD TV models, include an integrated HD digital TV Tuner.

Q: I have been told that Analog Television Transmission will still be active in some areas until 2013, If I am in a Analog service area, can I still receive these channels?

A: YES, the New Sphere Platinum Range of LCD TV models, are equipped with both Tuners, so it will scan both Analog & Digital services in your current area.

Q: I had recently (2 years ago) purchased a Large Flat Screen television at home that did not have an inbuilt Digital Tuner, and had to upgrade with the addition of an external set top box to be able to receive the Current Digital Broadcast. Is this New Sphere Platinum Range safeguarded to any future updates or Broadcast Changes?

A: YES, the New Sphere Platinum Range of LCD TV models, can decode the Current MPEG2-HD and future H.264/MPEG4-HD AVC formats. So once more channels are released, you will have access to these as well.

Q: How is this TV powered (12V/240V)?

A: The Sphere Range of LCD TV's have been designed for RV use, so it includes the 12VDC power cable, that connects to your 12V socket in your RV, great for Free camping with family and friends. Should you be at a RV Park (or even at home) and wish to run the LCD TV from 240VAC Mains Power, simply use the 240V power adaptor that is supplied, and the unit will operate correctly.

Q: What is the voltage range that is suitable for this TV to operate on?

A: As these Sphere LCD TV units have been designed for the RV industry, it has a wide voltage range of 10.8VDC—17VDC, this protects your LCD TV from voltage Fluctuations, like when connected to battery chargers, or even if using a generator or solar chargers.

Q: Can this product be used as a Computer Monitor while travelling or at home?

A: YES, the Sphere Range of LCD TV's have a monitor & Audio input, so a laptop or desktop computer can be connected with ease.

FAQ

Q: Can I connect a Gaming Machine or a HD device to this LCD TV?

A: Yes, The Sphere Platinum Range of LCD TV's has several Inputs/Outputs, like HDMI, Component, Composite and S-Video.

Q: Can I connect My Headphones to this LCD TV?

A: Yes the LCD TV, has a dedicated Headphone output socket (3.5mm Stereo)

Q: I would like to record Digital TV while I am holidays so I don't miss my favorite shows, do I need a DVD/HDD Recorder unit?

A: The LCD TV, has a Composite AV output, that can be connected to your DVD/HDD Recorder unit, though you can take advantage of its built in Recording system, simply plug in a USB Flash drive or portable hard drive, and you can record directly to this device.

Q: What size USB HDD should I use, if I want to use the record option on the TV?

A: The LCD TV is able to work with sizes from 1GB-1TB drives. Keeping in mind, that the USB port has a limited power output, so drives of approx 320GB-500GB that are "**USB Powered**" are most suited. The bigger the drive the more power it requires, so extra power supply cables may be required for the larger drives (of up to 1TB) to operate correctly.

Q: How Many shows/recordings can a USB HDD store?

A: The larger the drive the More storage you will have available. For an example a 320GB USB HDD, can hold up to 140Hrs of Standard Definition Digital TV, or up to 40Hrs of High Definition Digital TV.

Q: Can I connect this LCD TV to my internal RV Speakers?

A: Yes, This can be done in many ways.

1. Via the Coaxial Digital output

(should you have a amplifier with this input on board)

2. Via the Composite AV output from the TV

(Connects to your AM/FM Receiver, should this have a AUX Input

Note, this is a Fixed level Audio output)

3. Via The Headphone output socket from the TV

(Connects to your AM/FM Receiver, should this have an AUX Input,

Note this operation will mute the LCD TV Speakers)

FAQ

Q: Can I connect this LCD TV to other TV's that I have in my RV?

A: Yes, As this LCD TV has Composite (Yellow/White/Red) AV Outputs, you can use this TV as your Master TV, and have other TV's in the Van as a Screen only. (Great for when Family & Friends are over, you can watch a Movie on the Inside TV of the RV, and have the 2nd or Outside TV playing the Same movie)

Q: Can I View photos of my holiday on this LCD TV?

A: Yes, there are several ways to view Photos/images on this TV

1. With the use of your cameras, AV leads.
2. If these are stored on a Photo CD.
3. Load your SD/MS/MMC card in to the Card reader (up to 16GB)
4. Load your USB flash drive into the card reader (up to 16GB)

Q: What Warranty is offered with this Unit?

A: The Sphere Range of LCD TV's are covered by a One Year Warranty, Including a "ZERO Bright" pixel Guarantee for one Year.

Q: How Are DVD's Played on this TV?

A: The LCD TV, has a detachable DVD Drive on the rear side of the TV, it is as simply as selecting DVD Mode, and loading the DVD in the loader.
No more messy cables.
