## CAMEC FOUR SEASONS HATCH

Camec's New 4 Season's Hatch exceeds 220 square CM of permanent open area. This exceeds the Australian Gas Installation requirements of, 210 square centimetres permanent open area, for all Caravans over 6 metres (internal length of caravan).

Australian Standard AS5601-2004 Gas Installations; clause 6.2.7 (c) refers to table 6.3. Table 6.3 states; required Air Supply to Flued Appliances Installed in a Caravan = minimum 210 square centimetres total free ventilation area (permanent open area) is required in the upper level. The ventilation (permanent open area) is to be within 300 mm of the highest part of the ceiling or roof, for all Caravans over 6 metres long (internal length). Therefore: 1-only Camec New 4 Seasons Hatch @ 220 square centimetres permanent open area, requires no further added ventilation to comply with AS5601-2004 Gas Installations.
