

ALDEN SATELLITE TEST PROCEDURE

QUICK SET UP GUIDE

TEST 1

Switch the **ALDEN** SSC Unit to the ON Position.

Select the '**OPTUS C1**' SATELLITE and '**YOUR AREA ZONE**' (the unit may take up to 3-5 minutes to search, '**SEARCH**' LED Will be ON, Once locked onto the Optus C1 satellite 2 'BEEPS' will be heard and only the **C1**, **YOUR AREA ZONE** & **POWER** LED's should be ON)

With the LCD TV set to the correct input mode (AV1 or AV2) Switch on the STRONG SRT4664X Satellite Decoder, A COAST TO COAST Start up screen should be displayed on the screen.

With the STRONG Remote Control, press the *Group* button and a small menu will appear, Scroll Down & Select the Optus C1/Ku band satellite
(If left on *ALL SATELLITES*, Channels can be found, though many will be listed as *NO or BAD SIGNAL*)

Scroll to Channel 1 'EXPO' and Channel 2 'TUNE @ 156' (An Optus Test station).
If both of these Channels are displayed, the system is connected correctly. (Proceed to TEST 2.)

TEST 2

On the **ALDEN** SSC unit, Change to the '**iNTELSAT8**' SATELLITE and '**YOUR AREA ZONE**'

(the unit may take up to 3-5 minutes to search, '**SEARCH**' LED Will be ON, Once locked onto the iNTELSAT8 satellite 2 'BEEPS' will be heard and only the **iNTELSAT8**, **YOUR AREA ZONE** & **POWER** LED's should be ON)

With the STRONG Remote control, press the *Group* button and a small menu will appear, Scroll Down & Select the iNTELSAT 8/Ku band satellite
(If left on *OPTUS C1 satellite*, Channels will not be found, *NO or BAD SIGNAL will be displayed*)

Scroll to Channel 20 'SelecTV' (SELECTV Test station).
If this Channel is displayed, the system is connected correctly.

On the **ALDEN** SSC unit, Press the **RED** Push button and the '**CLOSE**' LED will turn ON. Once the '**CLOSE**' LED is off, switch the Main control switch of the **ALDEN** SSC unit to the OFF Position. (The system is now closed Correctly and safe for transport)

#NOTE# SHOULD A MOTORHOME OR CARAVAN BE TRANSPORTED IN THE REVERSE DIRECTION (OF NORMAL TRAVEL) ON A INTERSTATE TRANSPORT TRUCK, THE DISH SHOULD BE STRAPED DOWN TO PREVENT FLIPPING OVER IN TRANSPORT!(TAKE CARE NOT TO BUCKLE THE DISH IN THIS PROCESS, THE USE OF PACKING AIDS MAY BE NEEDED FOR THIS)
