Check before installation

In case of collision

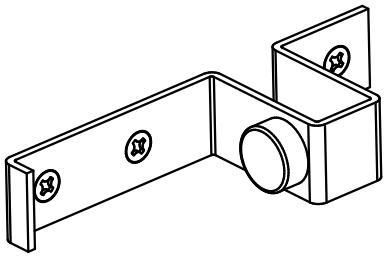

Solutions to avoid collision,
look at page 6.

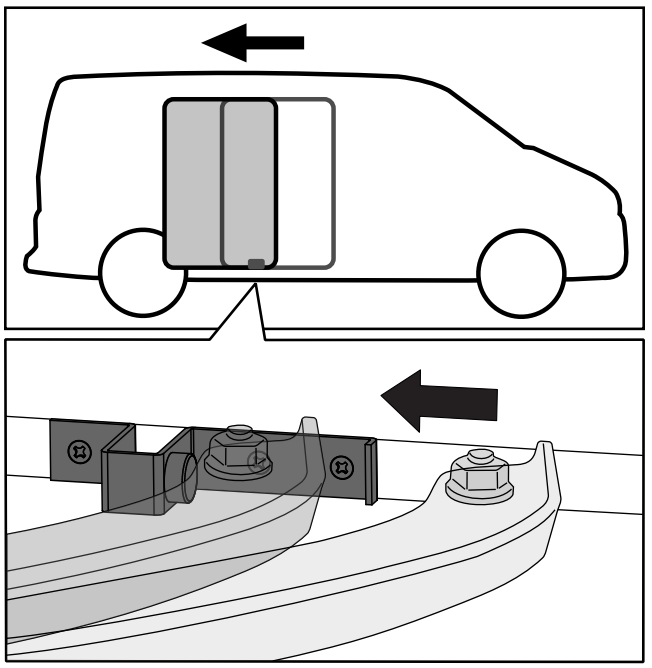

Solutions to avoid collision

In order to avoid collision between the van door and the lock. Two options are given.

A Door stop

A door stopper can be mounted in the lower door rail. This can stop the door before collsion apears between the door and the lock.

B Mounting place

The lock can be mounted higher on the surface. In general there is more place inbetween the door and the lock.
