

# BMPRO TREK3

## POWERING YOUR ADVENTURES

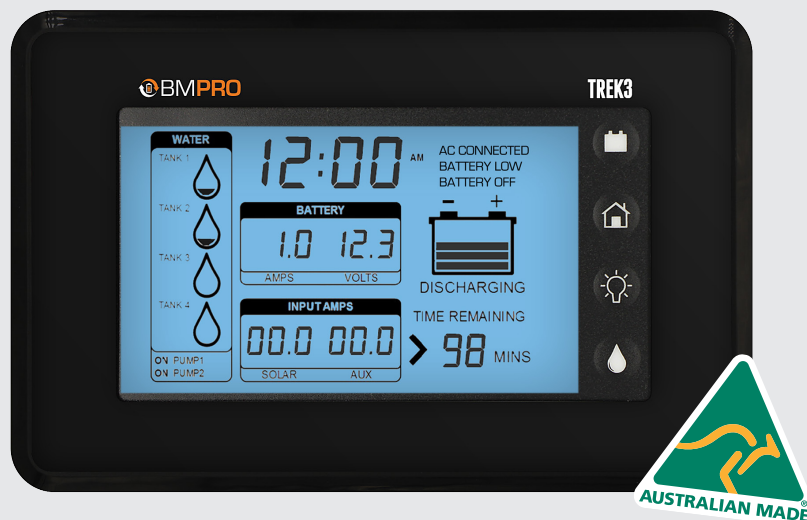

The Trek3 is a wall-mounted smart battery monitor designed specifically to operate with BMPRO's BatteryPlus35.

The Trek3 provides vital data at a glance including caravan battery voltage and charging/discharging current.

The Trek3 also provides an indication of the battery's remaining charge capacity as well as the time remaining before the battery completely discharges.

In addition to battery monitoring, the Trek3 enables monitoring of water levels of up to four water tanks and control of two water pumps, all from a sleek, wall mounted display.

The Trek3 can be connected to the OdysseyLink103\* to become a part of the Odyssey system. OdysseyLink103 enables SmartConnect Bluetooth sensors and the use of a free Odyssey App to remotely monitor the battery and control caravan's water pumps from the mobile phone.

## SPECIFICATIONS

Input Voltage Range	8V to 16V
Monitored Battery Capacity	50Ah to 600Ah
Visual Warning	11.0V (Low Battery)
Water Tank Monitoring	Dipper or Tank Bungs
Clock	12hr or 24hr
Backlight	Configurable
Battery Drain	< 22mA
Ambient Temperature	10°C to 50°C
Dimensions	164W x 108H x 22D

## KEY FEATURES

### Monitor:

- battery voltage and charge status,
- battery charging & discharging currents,
- Auxiliary and solar charging currents,
- Time remaining to discharge
- Level indication of up to 4 water tanks
- Time am/pm
- Battery on/off status

### Control:

- two water pumps

Backlight can be set as a night light

Function to disconnect the battery from the load

When used with the OdysseyLink103, enables SmartConnect and free Odyssey app
